Advance Requirement Engineering

Submitted to: Ma'am Irum

- Draw misuse cases against the given use case diagram.
- Define assets in the system.
- Define possible security constraints against each threat you will define in your misuse cases for the given use case.

(a) Misuse Cases

(b) Assets

- Order Database
- Payment Data

- **Payment process**
- **Integrity of the order**

(c) Possible Security Constraints

- **Misuser can remove your order.**
- **Misuser can Tamper with Payment Details**
- **Misuser user can divert payment.**
- **Misuser user can steal audit.**
